PROFILE

Highly skilled 1 DevOps Engineer with 1 years of experience designing and implementing disaster recovery plans, developing CI/CD pipelines, and leading teams of junior engineers. Proven track record in improving system performance by up to 30%, reducing deployment time by 70%, and automating operational tasks to improve team productivity by 40%. Adept at researching and evaluating new technologies to reduce operational costs and improve system uptime.

PROFESSIONAL EXPERIENCE

Associate Devops Engineer/Network Administrator

03/2024 – present

Webkorps Service India Pvt.Ltd

- Developed and implemented a CI/CD pipeline, reducing deployment time by 50% and increasing team productivity.
- Collaborated with development teams to identify and resolve system issues, resulting in a 30% reduction in downtime and improved system performance.
- Created and maintained system documentation, ensuring compliance with industry standards and improving overall system reliability.
- Developed and maintained scripts to automate system administration tasks, reducing manual effort by 50% and improving system efficiency.
- Set up and maintained development, staging, and production environments, ensuring seamless application deployment and improving overall system reliability.
- Monitored system logs and identified potential issues, resulting in a 40% reduction in system downtime and improved system performance.
- Implemented automated backup and recovery procedures, reducing data loss by 80% and improving system availability by 25%.
- Researched and evaluated new technologies, resulting in the adoption of a new monitoring tool that improved system performance by 15%.
- Collaborated with security teams to implement and maintain system security policies, ensuring compliance with industry regulations and improving overall system security.
- Managed Azure DevOps source control repositories, reducing merge conflicts by 50% and improving code quality by 30%.
- Developed and maintained Azure DevOps test automation, resulting in a 40% reduction in testing time and a 25% increase in test coverage.
- Implemented and maintained Azure DevOps monitoring and alerting, reducing downtime by 30% and improving system availability by 20%.
- Designed, implemented, and maintained Azure DevOps pipelines and build processes, resulting in a 50% reduction in build time and a 25% increase in build success rate.
- Developed and maintained Azure DevOps deployment automation, reducing deployment time by 60% and improving deployment success rate by 30%.
- Developed and implemented Azure DevOps infrastructure as code, resulting in a 40% reduction in infrastructure provisioning time and a 20% increase in infrastructure reliability.

System Network Engineer

06/2023 – 02/2024

Voso Retail Tech Pvt.Ltd

- Analyze network performance and identify technical solutions to improve availability, throughput, and utilization in support of over 300+ devices and 200 users.
- Install, configure, and upgrade network equipment, conduct purchases valued at over \$200K, and perform equipment testing.
- Select vendors and perform negotiations to improve pricing, resulting in a \$70K reduction in annual equipment costs.

- Oversee a team of 15 technical support specialists and system administrators, define workflows, prioritize project tasks, and provide coaching and mentorship.
- Delivered technical support to internal and external users to resolve issues related to hardware, software, and network infrastructure.
- Evaluated information systems and networks, identified issues and process gaps, and proposed solutions based on system capabilities.
- Attended meetings with the IT department and stakeholders to define long-term strategy for system implementation and network enhancements.
- Plan and execute a network domain migration and transferred data from more than 200 PCs, laptops, phone systems, and peripherals in support of 150 users.
- Update all user desktop, laptop, and network servers with Active Directory Group Policies, Windows Server Update Services, and McAfee Antivirus.
- Perform daily and weekly backups of servers and network devices
- Manage operations and configuration of network infrastructure, including routers, switches, and Wireless Application Protocol (WAP).
- Analyze network infrastructure and propose solutions to clients based on business needs and performance issues.
- Enhance security for client businesses by installing appropriate firewalls and virtual private networks (VPNs).
- Perform analysis on existing hardware and software components to identify areas for improvement via replacement or upgrading.
- Supervise troubleshooting workflows to identify immediate and potential issues in network infrastructure while researching and implementing economic solutions.
- Deep understanding of networking protocols (e.g., IPSEC, HSRP, BGP, OSPF,).
- Solid understanding of the OSI or TCP/IP model.
- Hands-on experience with monitoring, network diagnostic and network analytics tools.

SKILLS

Cloud Platforms: Amazon Web Services (AWS), Microsoft Azure, Google Cloud Platform (GCP).

- Containerization and Orchestration: Docker, OpenShift, Kubernetes Amazon Elastic Container Service (ECS), Amazon Elastic
- Kubernetes Service (EKS).
- Version Control: Git, GitHub, GitLab, Bitbucket.
- Infrastructure as Code (IAC): Terraform, AWS CloudFormation, Azure Resource Manager (ARM) Templates.
- Monitoring and Logging: ELK Stack (Elasticsearch, Logstash, Kibana), Prometheus, Grafana, Splunk, Amazon CloudWatch, DataDog.
- Automation and Scripting: Python, Go, Shell scripting (Bash), PowerShell, YAML file.
- DevOps Toolchain Integration: JFrog Artifactory, SonarQube, Nexus Repository Manager, packer.
- Operating Systems: Linux (various distributions), Windows Server.
- Networking: TCP/IP, UDP, BGP, OSPF, Cisco Routing and Switching, Firewall Configuration (Cisco ASA, Palo Alto), VPN Technologies
- (IPsec, SSL VPN), Network Monitoring (Nagios, PRTG, Prometheus), Load Balancers (F5, HAProxy), DNS Management, VLAN
- Configuration.
- Security Measures: Security Incident Response, Security Incident Reduction, Security Group Configuration, Disaster Recovery
- Planning, Identity and Access Management (IAM), Multi-Factor Authentication (MFA).

CERTIFICATES

DNA & DCA

- Diploma In Network Administration.
- Diploma in Computer Application.

EDUCATION

- Bachelor of commerce, vikram university Ujain.
- High Secondary Education, MPBSE shamgarh.
- High School Education, MPBSE shamgarh.

LANGUAGES

English

Hindi
